## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. **Claims 1-25**, drawn to establishing an IP session using a call establishment message that contains at least routing information in the header and payload, classified in class 370, subclass 389.
  - II. **Claims 26-47**, drawn to an updating for redirection for a call establishment session, classified in class 370, subclass 262.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility of storing or retrieving information at an endpoint (i.e., first or second device as claimed). In particular, Invention II does not require that caller information be included in the body and header of the message. Invention I does not further require retrieving/storing information for a first device. Specifically, see e.g., applicant's figure 6 where invention I may be directed to e.g., steps 210-222 but does not require step 224. Invention II, however, requires step 224 but does require step 216. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2663

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Craig Hoersten around 10/24/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Derrick W. Ferris whose telephone number is (571) 272-3123.
